SINCE
1989

Decora has over 20 years of experience in the managing and manufacturing of Handtufted carpets for various prestigious projects such as the Bank of Indonesia, The VVIP terminal for the President and Ministers of Indonesia at the International Airport, Pertamina and several resorts in Bali such the Eastin Hotel and other five star establishments.

Decora's team is well experienced in creating tailor made handtufted carpets and rugs for the most demanding designers in the country using the best quality of materials and high manufacturing quality.

INTRODUCTION

HANDTUFTED CARPETS

Decora 's handtufted services include mainly custom handtufted rugs for hotel and residential bedrooms, Hotel lobbies, offices and for retail stores around Indonesia.

MANUFACTURING STANDARDS

Decora strictly follows international standards for manufacturing of handtufted carpets for commercial use and provide in depth technical assistance to clients to ensure that the specifications are equal and if not higher than the minimum requirements for the area of use.

QUALITY CONTROL

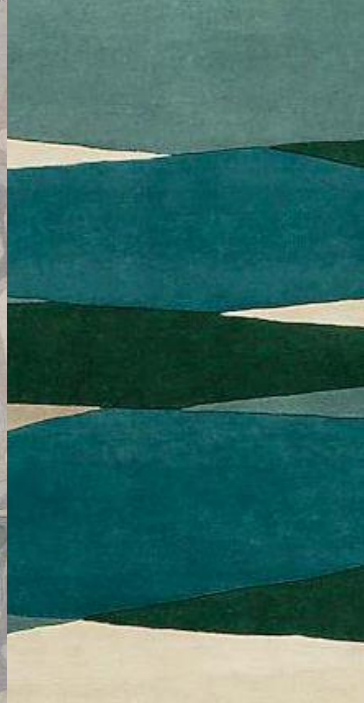

Decora has a 5 step process for ensuring maximum results in all projects.

1. Strike off approval prior to manufacturing
2. Site measurement and approval prior to manufacturing
3. Site survey of the floor surface prior to manufacturing
4. Site survey of the floor prior to installation
5. Installation inspection and rectification

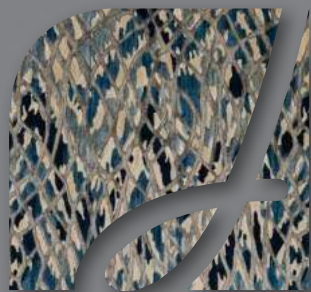

INSTALLATION

Decora's team of installers have been with our company for decades and are one of the most qualified teams in Indonesia for handling the installation of Handtufted carpets.
